

Dear LIHEAP Customer,

Through CAPCIL's partnership with Nexamp we have already helped over 45 households save money on their monthly energy bills. These households account for over 350kw of solar energy. That amount will save these families over \$10,000 over the lifetime of the solar project. We are excited to continue this partnership with Nexamp to provide income eligible Ameren customers the chance to sign up for community solar and lower their Ameren electricity costs through the Illinois Solar For All program. Supporting the residents of our communities is important to CAPCIL and we are always looking for ways to help customers better afford their utilities. If you have already signed up, we thank you and please disregard this letter.

Nexamp has built this unique community solar farm, and in accordance with the Illinois Solar For All (ILSFA) program, the financial benefits of this solar farm are reserved exclusively for low and moderate income households¹. The Illinois Solar For All program provides greater access to the savings and benefits of clean energy for all eligible Illinois residents.

By enrolling, you will earn credits on your Ameren utility bill for the energy produced by your share of the solar farm. Nexamp bills subscribers monthly for those credits at a **50% discount**. Through Nexamp's unique program, there is no minimum credit requirement, no upfront cost, and no long-term commitment – you can cancel your subscription at any time. **You can still receive LIHEAP benefits** with community solar. **Nexamp is not an alternative electric supplier AND** they do not sell door to door.

CAPCIL will work with Nexamp to PREPARE the enrollment documentation FOR YOUR REVIEW and SIGNATURE

With this unique partnership CAPCIL will work with Nexamp to submit the required documentation. All you have to do is give CAPCIL your permission to share your utility and LIHEAP information with Nexamp. To do this, you can send the signed permission form, either electronically on CAPCIL's website (capcil.info/nexamppartnership) or in the provided, postage paid envelope. Once we receive your permission your utility and LIHEAP eligibility information will be shared with Nexamp. After you talk with Nexamp and if you decide to sign up, they will analyze your electricity usage to determine the size of the solar farm share you need. They will then send you a community solar subscription agreement to review and sign. Once you sign, Nexamp will link your Ameren account to the community solar farm.

Call Nexamp at 800-966-4979 to speak with a Nexamp solar expert, OR Visit ILSFA.nexamp.com

Best regards,

Ryne Komnick
Interim Chief Executive Officer
CAPCIL

Zaid Ashai
CEO, Nexamp

¹ Residents qualify for the ILSFA program by participating in an income qualified program such as LIHEAP:

² Please note that CAPCIL is not involved in administering the community solar program, so all questions should be directed to the solar company, Nexamp.
